Enhance patient education with A.D.A.M.'s award-winning images and content available in English and Spanish

Content meets Joint Commission standards for plain language and is written at 5th to 7th grade reading level

Point of care patient education for the Allscripts® Sunrise EHR

The continuum of care begins with the educated patient. Ensure that your patients are provided with actionable, patient-centric health content that helps them better understand their symptoms, medical conditions, and treatment options - before, during, and after care.

A.D.A.M.'s SmartCare™ provides an end-to-end patient education solution combining award-winning images and illustrations alongside robust evidence-based and up-to-date medical content to give patients an engaging learning experience. With HL7 Infobutton search you can quickly find and print articles for your patients and post to a Sunrise EHR document folder.

The patient education articles are written by professional medical writers at the 5th to 7th grade reading level and reviewed to meet health literacy guidelines. Along with A.D.A.M.'s medical image assets, the patient education articles are designed to provide easy-to-understand information without overwhelming patients or their families.

Patient education articles can be easily customized to include clinician notes, your organization logo, and contact information. A.D.A.M.'s patient education articles are accredited by URAC, so clinicians can feel confident that patients are receiving up-to-date, evidence-based content.

- ✓ HL7 Infobutton search provides quick access to clinically accurate articles for point of care
- ✓ Maximize patient education with detailed explanations, images, and full-color illustrations with actionable content
- ✓ Helps increase HCAHPS scores by increasing patient satisfaction with detailed patient education materials
