CheckinAsyst®

Reimagine
Patient Intake

> Slide to check in

CheckinAsyst® is an automated platform for patient intake and communication that engages your patients in their care delivery. By digitizing paperwork and automating workflows, you can free up your staff to focus more on what matters for your practice- quality patient care!

CheckinAsyst leverages integration capabilities offered by the leading EHR/PM software in the market to deliver rich functionalities for your practice*

+ 65%
increase in
patient payment
collection

+ 50%
or more reduction
in patient
wait times

+ 15 minutes
saved per patient
by clinicians

+ 20%
decrease in patient
no-shows with
appointment
reminders

CheckinAsyst has helped us eliminate costly paper, enhanced our ability to collect more revenue, and improved the overall check-in process and patient experience.

Tony Molchany
CEO
Mercer Bucks Orthopedics

We included mandatory questions in the patient forms to collect quality measures for MIPS. I am happy to say, we already achieved the highest allowable points this year for quality.

Evie Van Rijs
Clinical Services Manager
Tallahassee Neurological Clinic

*Varies based on your EHR/PM system

*CheckinAsyst functionalities are available only if the patient appointment data is captured by the platform from the EHR/PM at least once.

Improve Efficiency of Your Clinical Workflows

CheckinAsyst leverages its unmatched clinical integration to send patient intake data directly into your EHR. Your clinical staff and providers can review patient-reported data, and send it back to the respective EHR fields, all without any manual entries.

Reduce clicks and keystrokes

Update patient charts in a single click

Capture error-free data

The Front Office Command Center

An easy-to-navigate dashboard serves as the command center for your front office. This comprehensive view of your schedule allows your staff to monitor and control patient check-in, launch on-demand forms, and access detailed insurance eligibility information. Reconcile patient updates into your PM software in just a click. The front office can schedule auto-generated reports to track relevant metrics.

Eliminate long queues

Accomplish a paperless front-office

Accelerate patient payment collection

Gain powerful insights on revenue collection

Increase focus on patient care rather than paperwork

On-demand Forms that Suit Your Dynamic Workflows

The intake process can be quite dynamic, and many a time, patients are required to complete more forms besides the standard workflow. With CheckinAsyst, you don't have to resort to paper in such cases. You can easily trigger an on-demand form for a specific patient to make it part of their workflow.

CheckinAsyst's extensive form library includes health assessments for various specialties including:

Orthopedics

Pediatrics

Surgical

Behavioral Health

OB-GYN

Neurology

Family Care

Urgent Care

& Many More

Use Patient-Reported Outcome (PRO) to Your Advantage

With CheckinAsyst, collecting and reporting Patient-Reported Outcomes (PRO) becomes a breeze-be it SDOH, data for MIPS reporting, or data for other compliance and grant requirements.

Improve the Financial Health of Your Practice

Don't keep patient dues on the back-burner anymore. CheckinAsyst offers flexible and patient-friendly ways to collect patient dues. This includes:

- POS collections
- Online payment with website widget
- Payment plans configured based on appointments
- Payment collection for patients without appointments

The Flexibility You Expect _____

CheckinAsyst allows you to set up a check-in workflow that works best for you and your patients.

- "Use Your Own Device" option for patients to *pre-register from home, confirm arrival using QR code*, or even complete intake at the facility
- *Self-service or assisted* patient check-in modes
- Choice of form factors including stand-alone and tabletop *kiosks* and *hand-held* check-in devices
- *Multilingual support* for intake forms (English, Spanish, and Arabic)
- *Ad-free* and user-friendly interface with *no app, no password*

Patient Communication Hub

CheckinAsyst Communication Hub offers you all the necessary tools to enable seamless, real-time, secure, and compliant communication with your patients.

Pick and choose from an array of offerings and the channel of your choice that includes email, text messaging, and voice messages. The offerings include:

Appointment reminders - Actionable and automated

Payment reminders - Built with secure payment link

Patient broadcasts - For custom, targeted messaging

Secure chat - Patient & staff-initiated chat

Patient surveys - Flexible, custom survey options

Security and Compliance

Our customers' data security and privacy is our top concern. CheckinAsyst is a HIPAA-compliant solution developed by an ISO 270001 and SOC 2 Type II compliant organization.

Zero-touch Intake

CheckinAsyst offers zero-touch workflows for a safe and convenient check-in experience for your patients. This includes:

- Ability for patients to **complete their pre-visit information from home** using their mobile or computer
- Patients can **review or update** their demographic and clinical data, complete assessments, and **sign consent forms**
- Option to **pay copays and balances** via flexible payment modes before the visit
- **QR code-based arrival confirmation**

Patient Self-scheduling

CheckinAsyst has partnered with an industry leading self-scheduling solution. With its AI-driven workflows, practices can manage their appointment schedule with minimal staff intervention.

Intake for Telehealth

CheckinAsyst's Intake for Telehealth module allows easy management of virtual visits via the CheckinAsyst Dashboard. We are vendor-agnostic and can work with a telehealth solution of your choice.
