

FEATURES

Stand Alone Mode

Open Chart2PDF and extract patient records even if you are logged out of the EHR.

Advanced Patient Searching:

Find patients with more search options, including: MRN, Full or Partial Last Name, First Name, and Birthday.

Extraction Status:

Enable users to see when an extract has been completed.

Global Document Options:

Check and uncheck document filter options to change what appears in the extracted chart.

Team Task Management:

Efficiently distribute tasks only to active teams.

Long Results Support:

Format long results into their own document.

Output to Specific Folders:

Create and organize batch output folders by Organization name or Organization ID.

Pay-By-Chart Pricing:

Only pay for what you use with our new pricing model.

Patient Records On Demand

Chart2PDF is a powerful add-on tool designed to make exporting patient records efficient, easy and fast. It provides for quick conversion of patient charts to PDF format allowing the output of 1 or 10,000 patient records, saving time and improving your workflow.

With Chart2PDF, you can instantly filter, export, print, save and scan every document, note, scan, and clinical summary in a patient's history. And of course, quickly generate a PDF version of your patient's chart. As one of our interoperability applications, Chart2PDF strengthens your clinical and financial performance, while taking meaningful steps to unify and connect your practice information systems.

Chart2PDF offers...

10,000

charts or more output
per batch

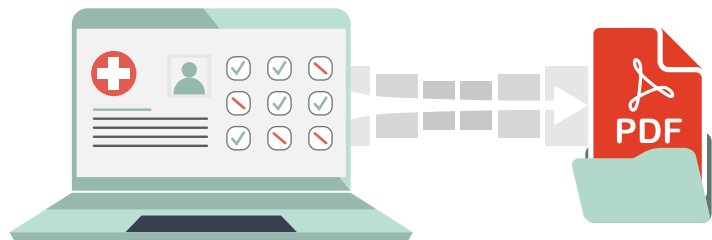

1,000

page output per
minute, the highest in
the industry

2

flexible workflow
options, On-Demand
and Batch Automation

Chart2PDF

Efficiency: Chart2PDF has two useful workflow options available: On-Demand and Batch Automation. The first allows you to create, personalize, and export a single patient chart instantly. The second allows you to select, personalize, and export multiple patient records immediately or at a later scheduled time.

Productivity: Free up your staff with Chart2PDF. End preoccupation with time consuming tasks such as printing, scanning, and creating one patient chart at a time. This application allows you to end the inefficient use of staff resources on tedious administrative tasks.

Cost-effectiveness: Reduce your material and labor costs associated with creating, storing, and exporting patient records. Chart2PDF is all digital and does not require significant physical resources in order to function effectively.

Personalization: Patient charts can be personalized with photos and other identifiers. This allows practices to easily identify and organize patient records while adding a much-needed human touch to patient care.

Security and Risk Mitigation: Chart2PDF protects sensitive patient information. All exported charts are password protected for security. Additionally, there are several reporting features available including data on application use and an audit of all extracted charts categorized by disclosure reason. **You can also quickly respond to legal and insurance audits with Chart2PDF.**

Chart2PDF for Allscripts and Nextgen

Chart2PDF is a certified application for both NextGen Enterprise EHR and Allscripts TouchWorks EHR. Designed to integrate into your system, this application will significantly improve your chart requests processing.
