

Innovative Full Spectrum Patient Engagement

PatientLink Online - Patients complete forms prior to their appointment using any web enabled device, or in the office. Their answers flow into the EHR as discrete structured data.

Kiosk or Smart Device - Give patients the option to complete their forms in the office using any web enabled device.

PatientLink Scan - When patients complete paper forms, our software digitizes their answers, which flow into the EHR as discrete structured data. The multi-use scanners also accommodate all other scanning needs.

PatientLink Features and Benefits:

- Meets** clinical and reporting needs – Discrete structured data flows into the EHR
- Streamlines** workflow – Forms are completed prior to appointment, or in the office
- Alleviates** data entry – Captures patient intake needs
- Meets** your exact data needs – Fully Customizable forms
- Improves** risk monitoring – Automates scored assessments
- Improves** patient engagement – Captures patient feedback
