Customize patient-specific intake questions, screeners, and consents in chart	✓	X
All patient information integrates directly with EHR and loads directly in chart	✓	X
Digital patient journey reflects <i>your</i> branding, not your EHR's	✓	X

Southeast Medical Group (formerly North Atlanta Primary Care), one of the largest healthcare practices in Atlanta, GA with over 90 providers, turned to PatientPage when faced with rapid patient growth and major staff burnout.

THEIR CHALLENGES:

- Manual registration causing long lines and appointment delays
- Incomplete and inaccurate data collection due to rushed check-in times
- Staff struggling to keep up with demands for patient chart updates

WITH PATIENTPAGE:

- **60%+ of patients self check-in** ~1 hour ahead of appointment via digitized intake, eliminating long lines
- **Digitized custom patient consent forms** according to appointment type, gender, and age
- **Direct Allscripts integration** auto updates demographics, contact information, and medical history directly to EHR
- **10 hours/ week / provider saved** of combined staff time

Southeast Medical Group patient quotes:

“I liked the option to fill out paperwork in advance and not have to do it when I got to my appt.”

“It made check in exceptionally easy.”

“It was very easy being able to do most of it online. I was only at the check-in desk for a minute or so.”
