

Provation[®] SurgicalValet[™]

Preoperative Care Coordination Solutions for Hospitals and Health Systems

With Provation[®] SurgicalValet[™] your team can simplify preoperative workflows—from scheduling to day-of surgery and everything in-between.

Cloud-based SurgicalValet makes care coordination, document management, patient engagement, and patient optimization easy because it can:

- Enable the Perioperative Surgical Home (PSH)
- Decrease case cancellations
- Shorten length of stays
- Minimize unnecessary preoperative testing
- Improve patient outcomes
- Drive patient satisfaction
- Increase efficiency and patient throughput
- Streamline communication
- Decrease costs
- Improve preoperative processes
- Safely and efficiently address elective procedure backlogs

Powerful Integrations

- ✓ Cerner
- ✓ Epic
- ✓ Meditech
- ✓ Allscripts

SurgicalValet Solutions

Our comprehensive solutions are available in a modular fashion, allowing you to choose additional features and the right modules for your organization.

Simplify the scheduling process by flagging required fields, pre-populating procedure information, and automating transfer of order request to facilities.

- Surgical Order Request

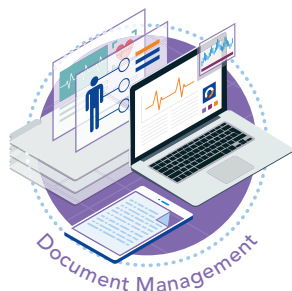

Automate personalized patient instructions and allow patients to engage with their healthcare team through your facility's patient portal and email.

- Online Intake
- Personalized Instructions, Content and Reminders
- Appointment Notifications

Streamline care team coordination with digital tasks and use our clinical decision support to provide individualized preoperative test and consult recommendations.

- Patient Readiness Tracking
- Tests and Consults
- Clinical Decision Checklists

Transform paper-based preoperative information-gathering into a streamlined, electronic process, while organizing data from community EHRs, HISs, and faxes into a unified workflow for schedulers, physicians, RNs and administrators.

- Collaborative Document Review
- Mobile Health and Physical (H & P) Updates
- Electronic Fax Queue
