## Medication Tracking and Inventory Management Solution with Barcode Scanning for EMR/EHR

### Overview:

For over 30 years, Associated Retina Consultants has served the Arizona community by providing access to the most innovative treatments of diseases and conditions affecting the retina, macula (the back of the eye) and the vitreous humor (gel like tissue) of the eye. Each of their physicians is certified by the American Board of Ophthalmology and have completed formal subspecialty training in medical and surgical diseases of the retina.

### Challenges:

- The need for an EMR/EHR integrated medication tracking and inventory management solution
- Data errors within patient chart workflow
- Time consuming manual data entry and correction
- Lack of real-time inventory tracking reports

### Solution:

TriNet Medical SRX provided a robust solution for tracking medications and inventory management that is integrated directly with their EMR/EHR.

### Outcome & Benefits:

- “Decreased user errors.”
- “Ease of use for medication tracking and reporting.”
- “Improved time management for MA’s, nurses and physicians.”
- “Fewer clicks in our EMR.”
- “Automated charge/order population in EMR.”
- “Manual data entry virtually eliminated.”
- “Needs met and expectations exceeded!”
